PRESS RELEASE JANUARY 27 2015

## FAS Converting Machinery AB and PECO Inc. Introduces Euroline bag making system at NPE 2015!

For the first time, FAS Converting and PECO Inc. are pleased to introduce the Euroline bag on roll system to the North American market. "We will have a live demonstration in our booth W4589 at the National Plastics Exhibition (NPE) in Orlando Florida March 23-27 2015", says Mr. Tom Helming, Sales Manager Americas at PECO Inc.

The Euroline is the FAS Converting group's latest North American market introduction and it combines proven bag sealing and perforating technology with industry leading coreless winding that have been the hallmark of the company since the 1980's.

The bag sealing and perforation module include:

- State of the art Servo drive
- Precise tension control for relaxed sealing of web
- Sealing from both sides of the web
- Non driven C folder

The winding module includes

- Industry leading coreless winding
- Perforation detection and automatic transfer
- Optional roll wrapping / labeling unit
- Optional PP insert capability

The Euroline can be run in line with your blown film extrusion system or out of line. The sealing/perforation system and winding system share a state of the art PLC touch screen interface control system and an ergonomic streamlined layout for maximum cost effectiveness and optimum floor space utilization.
